Greetings!

Working with Waneta Hebert has been a delight. Waneta's organizational skills dramatically increased the efficiency and productivity of our five-member instructional design team immediately upon her arrival. As project lead on a redesign effort for intensive faculty training, Waneta constructed a timeline with achievable goals and guided the team to analyze data to redesign the 32-hour course into a competency-based course that can be completed in just a few hours. The redesign process was smooth thanks to Waneta's realistic leadership and her flexibility in providing team members with choice while holding each accountable for their contribution. Waneta's ability to break down complicated tasks into related segments, regroup the pieces into meaningful components and reconstruct them in a way that makes more sense was essential to the redesign of the course

Waneta's knowledge of a variety of interactive and organizational platforms has proved invaluable to the redesign project as well as in our day-to-day operations. I look forward to continuing to work with her.

Regards,

Emily Chavez
